

HARTUNG

GLASS INDUSTRIES

M-RX 130 VERTICAL CNC MILLING & DRILLING CENTER

HARTUNG EXPANDS UNION CITY WITH NEW STATE OF THE ART FABRICATION EQUIPMENT

DESCRIPTION & HIGHLIGHTS

Quality & Efficiency – Designed for extremely fast and precise fabrication processing of heavy glass including doors and showers

Innovative Technology – Milling, grinding, drilling, and countersinking is possible in one cycle thanks to onboard tool magazine and rapid front and rear side tool change

Fabrication – Ideal for small custom or high volume production runs

Increased Throughput & Capacity – An extremely fast tool change with pre-selection during processing and 10 + 10 turret positions

Bigger Lites – Open top design for larger glass - call for details

Customer Commitment – Hartung's continues its commitment to Union City and northern California as we strive to be your supplier of choice

TECHNICAL SUPPORT

 **Bid Process** – Consulting with our team of glass experts early in a project can save time, money and improves glazing performance.

 **Project Management** – From pre-construction samples to close-out inspections, Hartung collaborates with stakeholders throughout the project.

 **Improved Lead Times** – Automation, lean manufacturing and process management support Hartung offering some of the fastest lead times in northern California.

 **Logistics** – Our transportation experts are responsible for safely shipping your orders where you need it, when you need it and how you need it.

| Drilling/Milling Thickness | 5/32" to 3/4" |
| Glass Types | Clear, Textured, Laminated, Mirror, Tinted, Printed, Fire-Rated |
| Milling/Drilling Maximum Size | Call for details |
| Drilling Minimum Size | 24" x 6" |
| Milling Minimum Size | 26" x 6" |

VERTICAL CNC MILLING & DRILLING CENTER

Manufactured in Austria by Schraml Glastechnik GmbH, Hartung's M-RX 130 work center increases throughput and fabricates common heavy glass hinges and complicated cutouts easily and accurately. The fully-integrated software, lightning quick tool change and open top design allows for extremely fast and flexible milling and drilling of small and large glass lites.
